
KAZAKHSTAN, CHINA STRENGTHEN NUCLEAR COOPERATION

- 20.07.2016

Trend, 19 July 2016

As part of the working visit to the Peoples Republic of China, the CEO of NAC Kazatomprom JSC Askar Zhumagaliyev met with the CEO of CITIC GROUP Corporation Chang Zhenming.

The heads of the companies discussed the issues of further implementation of joint Kazakhstan China projects as well as attraction of investments to the nuclear sector of the Republic of Kazakhstan, Kazatomprom said.

During the visit to the PRC, Zhumagaliyev met also with the Chairman of the Board of China National Nuclear Corporation Sun Qin and the Director General of CITIC GROUP Corporation in the Republic of Kazakhstan Sun Yang, the message said.

According to the message, the parties discussed a number of issues of mutually beneficial cooperation in the field of atomic power development. Particularly, such issues as natural uranium transit from Kazakhstan through the territory of China, fuel pellets supplies to China, joint uranium mining, conversion plant construction in the Republic of Kazakhstan, application of nuclear technologies in medicine were considered.

Participants noted that they are interested in a mutually beneficial long-term and strategic partnership, the message said.

According to the message, Zhumagaliyev met also with the Director General of China General Nuclear Power Corporation Zhang Shanmin. The parties discussed different issues of bilateral cooperation and highly appreciated the efforts on mutually beneficial cooperation.

Earlier, NAC Kazatomprom JSC and Chinese CGNPC signed the agreement of commercial terms for design and construction of FA production plant in Kazakhstan.
