25.01.2017

AzerNews/Trend (24 January 2017)

More than 25 percent of the Trans Adriatic Pipelines (TAP) route has so far been cleared and graded in Albania, TAP said on its Twitter page.

At the end of 2016, TAP AG completed the first phase of road infrastructure rehabilitation in this country.

TAPs route through Albania is approximately 215 kilometers onshore and 37 km offshore in the Albanian section of the Adriatic Sea. It starts in the municipality of Devolli, in the Korçë region, at the Albanian border with Greece, and arrives at the Adriatic coast 17 km north-west of Fier, 400 meters inland from the shoreline.

TAP is a part of the Southern Gas Corridor which is one of the priority energy projects for the EU. TAP project envisages transportation of gas from the Stage 2 of development of Azerbaijan's Shah Deniz gas and condensate field to the EU countries.

The pipeline will be connected to the Trans-Anatolian Pipeline (TANAP) on the Turkish-Greek border, run through Greece, Albania and the Adriatic Sea, before coming ashore in Italy's south.
