BAKU TO HOST 6TH REGIONAL INTERNET GOVERNANCE FORUM

-

05.03.2019

AzerTAC (04 March 2019)

The 6th Regional Internet Governance Forum under the theme Cybersecurity: Our common responsibility will be held in Baku, said UNDP Project Manager Vasif Mammadov.

Co-organized by Azerbaijan's Ministry of Transport, Communications and High Technologies and United Nations Development Program (UNDP), the forum aims to demonstrate different ways of using internet in order to achieve more fruitful and effective regional economic development and cultural progress.

The Internet Governance Forum provides a platform for exchange of experience and cooperation between local participants and international experts. It is also a good opportunity for discussing the current situation and future tasks in this field, as well as demonstrating interesting innovative ICT-related projects.
