
GREEK MINISTER IN NORTH MACEDONIA FOR TALKS ON COOPERATION IN TRANSPORT

- 22.03.2019

Tornos News (21 March 2019)

The prospects for cooperation between Greece and North Macedonia in road, rail and air transport and the construction of related infrastructure were examined during a meeting in Skopje on Thursday between Greek Infrastructure and Transport Minister Christos Spirtzis with North Macedonia's Transport and Communications Minister Goran Sugareski, ANA reports.

Sugareski said that Greece was a strategic partner for North Macedonia and that both countries place emphasis on the rail link running alongside Corridor 10, as well as the reopening of the railway from Bitola in North Macedonia to Florina in Greece. He said the two sides were also discussing the signature of an agreement on conducting joint border and customs checks, in a single building, for the railway border crossings at Idomeni-Gevgelija and at Neos Kafkasos-Kremenica. The goal was to speed up the procedures involved and the faster movement of goods and passengers.
