NUR-SULTAN. KAZINFORM

The deputies of the Majilis of the Parliament of the Republic of Kazakhstan approved the bill "On ratification of the International Cooperation Agreement between the Government of the Republic of Kazakhstan and the European Organization for Nuclear Research (CERN) relating to cooperation in science and technology", Kazinform correspondent reports.

Presenting the bill at today's plenary session of the Majilis, Minister of Energy of Kazakhstan Kanat Bozumbayev noted that the CERN is the leading global organization in the field of elementary particle physics research. The CERN's Large Hadron Collider is a unique engineering and scientific facility. Successful research in the field of high-energy physics and particle physics can only be carried out only by concerted efforts of scientists of many countries, only by focusing the world science intelligence.
