
EU REACHES DEAL TO DEFINE 'SUSTAINABLE' INVESTMENT

-

18.12.2019

EU Observer (17 December 2019)

The Finish EU presidency, European Commission and the European Parliament on Monday evening (16 December) all agreed on the common classification system for environmentally-sustainable investments - after disputes on whether gas and nuclear can be considered "green".

"With this deal, we now have a common language and new rules for financial markets," said Pascal Canfin, a French MEP who chairs the European Parliament's environment committee.
