
IRAQ: MISSILE ATTACK ON BAGHDAD'S GREEN ZONE

- 27.03.2020

Middle East Monitor (27 March 2020)

On Thursday at dawn two Katyusha rockets landed in the heavily fortified Green Zone in the centre of the Iraqi capital of Baghdad, where the US embassy is located, according to an official security media office statement.

A security source announced that the missiles targeted the US embassy, █████ landed hundreds of metres away in an empty square.

No one has yet claimed responsibility for the attacks. However, Washington pointed the finger of suspicion at the Hezbollah Brigades, affiliated with the pro-Iran Popular Mobilisation Forces (PMF).
