01.06.2020

---

Public Radio of Armenia (1 June 2020)

Armenian Prime Minister Nikol Pashinyan and his family have tested positive for Covid-19.

The PM says he has probably contracted the virus during a working consultation.

PM Pashinyan says none of family members has any symptoms.

I didnt have any symptoms, I decided to take a test as I was planning to visit the frontline, said Pashinyan.

The Prime Minister will now self-isolate in his residence and will continue to work distantly.
