The findings of the latest poll conducted by the Brima News Agency on the elections in North Macedonia that will take place on July 15 □ after the forced postponement of the scheduled elections of April 12, 2020, due to the new coronavirus – are worrying.

According to the poll, 48.9% of respondents do not trust any politician in North Macedonia, which may increase the percentage of citizens who will not go to the polls to vote, while posing questions to the leadership of the parties for their future political formations.

In terms of party rates, the difference between the two largest parties, Zoran Zaevs SDSM and Hristijan Mickoski VMRO-DPMNE is 3.6% in favor of SDSM, as it receives 18.7% against 15.1% of the party led by Mickoski.
