25.09.2020

i24 News (25 September 2020)

Iraqi Prime Minister Mustafa al-Kadhemi ordered a committee formed tasked to build a nuclear plant for research purposes, the Iraqi Commission for Control of Radioactive Sources announced Thursday.

The commissions president, Kamal Hussein Latif, told the Iraqi News Agency that al-Kazhemi had declared the formation following a summit with his French President Emmanuel Macron earlier in September.

Kadhemi said they discussed a future project to produce nuclear energy for peaceful purposes, while Macron asserted the importance of Iraq's sovereignty.
