
EU CYBER RESILIENCE PUSHED 'TO LIMIT' AMID CORONAVIRUS, REPORT SAYS

-

20.10.2020

EurActiv (20 October 2020)

The European Unions cybersecurity resilience has been pushed to the limit of its capacities as an indirect result of the ongoing public health crisis, warned a new report from the EUs cybersecurity agency ENISA, published on Tuesday (19 October).

The agency's 2020 Threat Landscape report surveys the landscape of the bloc's cyber resilience in the unprecedented context of the coronavirus pandemic, which has had a profound impact on cybersecurity formalities.

The crisis, the report states, has presented new challenges to EU cybersecurity but at the same time has afforded various new models for future transformation in this field.
