EU WARNS IRAN ENRICHMENT WOULD THREATEN NUCLEAR DEAL

- 05.01.2021

EurActiv (4 January 2021)

The European Union warned on Monday (4 January) that Iran's move to enrich uranium to 20% would be a considerable departure from Tehran's commitments under the 2015 nuclear deal.

EU spokesman Peter Stano said Brussels would wait until a briefing from the director of the UN's International Atomic Energy Agency (IAEA) watchdog later in the day before deciding what action to take.

Iran has started the process to enrich uranium to 20% purity at its underground Fordow facility, state media reported earlier on Monday, going well beyond the threshold set by the 2015 nuclear deal.
