Novinite (29 May 2023)

North Korea has informed Japan that it will launch a satellite within two weeks, but Tokyo believes it could be a ballistic missile and is therefore taking precautions, AFP reported.

Pyongyang informed Japan's coast guard that the launch would take place between May 31 and June 11, with the launch carrier's first stage landing in waters near the Yellow Sea, the East China Sea and east of Luzon Island in the Philippines, a coast guard spokesman told AFP.
