Reuters (11 June 2023)

Russia said on Sunday that Ukraine had made unsuccessful attempt to attack a Russian naval ship with six high-speed drone boats as the Russian vessel patrolled major natural gas pipelines in the Black Sea.

The 'Priazovye' ship was carrying out what Russia's defence ministry said was "monitoring of the situation and ensuring security along the routes of the TurkStream and Blue Stream gas pipelines in the southeastern part of the Black Sea."

Ukraine attacked in the early hours of Sunday about 300 km south-east of Sevastopol, the headquarters of Russia's Black Sea fleet on the Russian-annexed Crimean peninsula, the defence ministry said.
