Belarusian President Alexander Lukashenko has said his country has started taking delivery of Russian tactical nuclear weapons, some of which he said were three times more powerful than the atomic bombs the US dropped on Hiroshima and Nagasaki in 1945.

The deployment is Moscow's first move of such warheads - shorter-range less powerful nuclear weapons that could potentially be used on the battlefield - outside Russia since the fall of the Soviet Union.

"We have missiles and bombs that we have received from Russia," Lukashenko said in an interview with the Rossiya-1 Russian state TV channel which was posted on the Belarusian Belta state news agency's Telegram channel.
