The Diplomat (17 August 2023))

Hyung-jin Kim

The National Intelligence Services aid it has detected unusually heavy activities at a North Korean facility that produces solid-fueled intercontinental ballistic missiles and at another site related to liquid-fueled ICBMs.

North Korea is preparing for a new round of provocative weapons displays such as long-range missile tests and a spy satellite launch, as it ramps up illicit activities to support its fragile economy, South Korea's intelligence service told lawmakers Thursday.
