Novinite (18 September 2023)

A drone of unknown origin and, according to unconfirmed information, with an explosive device, was found on the coast of Tyulenovo. It was found by chance late last night.

It is not clear how the drone ended up on the Bulgarian shore - whether it fell from the air or was washed away by the current. There is also no information about the ownership of the drone. A signal was sent to 112 emergency number. The area is cordoned off.

The man who filed the report and took the photos of the drone, Radoslav Rusev, explained to the National Television that almost 12 hours later there is no investigation of the case.
