## FINLAND INVESTIGATES SUSPECTED SABOTAGE OF BALTIC-CONNECTOR GAS PIPELINE

-

11.10.2023

---

BBC News (11 October 2023)

Finland says damage to an underwater natural gas pipeline with Estonia on Sunday may have been deliberate and was probably caused by "external activity".

The Baltic-connector pipeline was shut down after a sudden drop in pressure. A telecoms cable was also damaged.

Finland's prime minister said on Tuesday that the source of the leak had been found and was being investigated by both countries.
