
CHINA VS US APPROACHES TO AI GOVERNANCE

-

20.10.2023

The Diplomat (19 October 2023)

Adam Au

Their differing approaches to regulation carry global significance as an AI arms race unfolds between the two fierce rivals.

As artificial intelligence (AI) barrels into every facet of life, its relentless momentum brings escalating perils. Differing attitudes toward governance have forked the policy roadmaps of two AI superpowers: China and the United States. With the most advanced AI capabilities and industries globally, both countries set influential norms that ripple worldwide. Their regulations carry global significance as an AI arms race unfolds between the two fierce rivals.
