The new bombs dropped by former Prime Minister Antonis Samaras "froze" Maximou, which however, signals that the government is not changing policy.

The new bombshells dropped by Antonis Samaras on Greek-Turkish relations, same-sex marriage and the tax law for freelancers have "frozen" Maximou, which, however, says that the government is not changing its policy.

"The former prime minister's views are known and we have no comment. The government is moving on the basis of its programme and its declared positions. On the basis of these, it also implements its policy," government officials in particular said, commenting on Samaras' interview with Kathimerini.
