The Guardian (22 January 2024)

Andrew Roth

*Report shows Russian ships loading at North Korean port, amid accusation that Pyongyang supplies missiles and shells.*

The UK has provided satellite photographs of North Korean cargo shipments to Russia to a panel of UN experts as part of an attempt to trigger an official investigation into arms deals in violation of international sanctions.

North Korea has been accused of supplying ballistic missiles and hundreds of thousands of artillery shells to the Russian government for its war in Ukraine since Vladimir Putin met with Kim Jong-un in Russias far east in September.
