Politico (27 March 2024)

Jamie Dettmer

Ukrainian lawmakers fear the army and local authorities are not digging quickly enough or building sufficiently formidable defensive fortifications to withstand an expected Russian offensive in the northeast and southeast of the country.

We were warning since last summer that you have to construct defensive fortifications on an industrial scale, bringing together the appropriate ministers and local military administrations to build defensive lines fast and make them extremely strong, opposition lawmaker Rostyslav Pavlenko told POLITICO.
