13.06.2024

---

Kabar (13 June 2024)

Inaugurating the 3rd Dushanbe Water Action Decade Conference Water for Sustainable Development, 2018 – 2028, Tajik President Emomali Rahmon noted on June 11 that modern risks and rising threats are becoming relatively fast and effective, ASIA-Plus reported.

Over the last five years, we have consistently been witnessing the hottest years and months on record on our planet, Tajik leader said, noting that according to reports, 2023 was recorded as the hottest year as well.

There is a strong possibility that this is not all what has yet to come, and we will witness more record numbers in the next few years, Emomali Rahmon noted.
