Reuters (20 February 2025)

Armenian Prime Minister Nikol Pashinyan called on Wednesday for the country to change its constitution, a move demanded by Azerbaijan that could facilitate a peace treaty between the longtime rivals.

"The adoption of the new constitution by a national referendum is essential," Pashinyan said during a televised address, adding that the current document lacked legitimacy.

He did not set a date for a referendum nor specify what would be contained in a new draft of the constitution.
