Türkiye will continue to work with Indonesia on the reconstruction of Gaza and to defend the Palestinian cause in the days to come, President Recep Tayyip Erdoğan said in a joint news conference with his Indonesian counterpart Prabowo Subianto, as both leaders vowed to further boost cooperation.

Erdoğan noted that they discussed steps that can be taken to raise the trade volume to the target of \$10 billion in a balanced and mutual manner.

We agreed on making new breakthroughs in our cooperation. We reviewed existing projects and explored new areas of collaboration, the president said, adding that the two countries aim to further strengthen their partnership.
