Trend News Agency (2 December 2025)

Kamol Ismailov

Uzbekistan has launched construction of an integrated nuclear power plant in the Jizzakh region, which will comprise two small-capacity reactors and two large reactors, Trend reports via the press service of the President of Uzbekistan.

The progress of the project was presented during President Shavkat Mirziyoyevs visit to the region, where he reviewed ongoing efforts in the development of the countrys nuclear energy program.

At this stage, excavation works for the reactor buildings are actively underway. In parallel, preparations for the construction base are being carried out, including land leveling, concreting, and installation of reinforcement structures. A temporary residential complex has also been built to accommodate construction personnel.
