## MAJOR REVIEW SHAPING KYRGYZSTAN'S GREEN ENERGY SECTOR IN 2025

- 06.01.2026

---

Trend News Agency (6 January 2026)

Khayal Khatamzadeh

*The development of green energy became one of the key priorities of Kyrgyzstans state policy in 2025. Against the backdrop of growing electricity demand and the need to reduce dependence on weather-related factors, the authorities focused on expanding renewable energy capacity, modernizing existing facilities, and attracting investment into new projects.*

Dozens of solar and hydropower projects were started or moved forward this year. These projects ranged from building small hydropower plants and getting ready to open big ones to making the country's first large-scale solar power projects. Overall, 2025 marked a shift from isolated initiatives toward a more systematic approach to green energy development, strengthening Kyrgyzstans energy security and laying the groundwork for long-term sustainable growth.
