Uzbekistans Fergana region has reached an agreement with Chinese investors to advance the development of renewable energy projects, including the establishment of wind power plants, Trend reports via the Fergana Regional Administration.

The agreement was reached during a meeting between Khayrullo Bozorov, the Governor of Fergana Region, and a delegation of seasoned Chinese investors specializing in construction and energy sectors.

During the discussions, the parties explored the initiation of promising foreign-investment projects in the Fergana region, while also identifying further avenues for expanding bilateral cooperation.
