
MOLDOVA MAY FACE DIFFICULTIES IN ENSURING ELECTRICITY SUPPLY

-

27.03.2026

Moldpres (27 March 2026)

The Republic of Moldova may face difficulties in ensuring electricity supply during peak hours on March 27, warned Minister of Energy Dorin Junghietu. The official stated that although solutions were found for March 25 □□ to cover consumption needs without resorting to emergency energy, the situation for Friday remains uncertain.

Junghietu said that the preliminary results of the auctions indicate a significant deficit, especially during peak consumption intervals □ in the morning, between 07:00 □□□□□ and in the evening, between 17:00-23:00.

There is not a very favorable situation regarding the capacities available at this moment. There is a risk that we will not have enough energy for import during peak hours, Junghietu noted.
