The 4th High-Level International Conference on Water Resources will be held in Dushanbe from May 25 2026, serving as a pivotal stage in the implementation of the UN initiative Water for Sustainable Development (2018) and as a preparatory platform for the forthcoming UN Water Forum in Abu Dhabi.

The conference represents a continuation of the Dushanbe Water Process, which encompasses the conferences held in 2018, 2022, and 2024, and functions as an interim forum bridging the current UN Water Decade with future global decision-making in this domain.

Against this background, Azerbaijan's involvement in the international water agenda has been steadily expanding. Ambassador Extraordinary and Plenipotentiary of the Republic of Tajikistan to Azerbaijan, Ilhom Abdurakhmon, emphasized that the cooperation between the two countries has consistently been strong and mutually reinforcing.
