Euronews (25 August 2026)

Luca Bertuzzi

France seeks time limits on Ukraine's derogations for non-EU defence purchases under [REDACTED] loan, in push for European [REDACTED] and French [REDACTED] producers. Kyiv benefits from exemptions for Chinese and US parts.

Ukraine has secured exemptions allowing it to source military equipment from outside Europe under the EU's €90 billion Ukraine Support Loan.

France is now pushing to limit how long those exemptions can remain in place, in an effort to ensure more of the EU-backed funding supports European [REDACTED] and potentially French [REDACTED] defence production, Euronews has learned.
