Ayana Birbayeva

Kazakhstans AI MONTH 2026 program opens Sept. 23 with a \$1.1 million HackAlem AI hackathon, launching a month-long series of events focused on artificial intelligence, digital technologies, investment, cybersecurity, robotics and technological entrepreneurship across the country.

Held as part of Kazakhstans Year of Digitalisation and Artificial Intelligence, AI MONTH brings together the technology community, businesses, educational institutions, startups, international experts and regional technology hubs. The program will culminate in the international AI & Digital Bridge 2026 technology forum, which will take place in Astana from Oct. 1 to 3.
