
ZELENSKIY SAYS UKRAINE HIT TARGETS IN RUSSIA SUCCESSFULLY OVERNIGHT

-

14.11.2025

Reuters (14 November 2025)

President Volodymyr Zelenskiy said on Friday that his troops had used long-range Ukrainian "Long Neptune" cruise missiles on targets in Russia overnight, adding that such strikes were getting more successful all the time.

"Overnight our warriors successfully used 'Long Neptunes' against designated targets on Russian territory – and this is our entirely just response to Russia's ongoing terror," Zelenskiy wrote on X.

"Ukrainian missiles are delivering increasingly significant and precise results virtually every month."
